

**COMPLETE AIRBAG PROTECTION**

## COMPLETE AIRBAG PROTECTION

While others only protect the front occupants with inflatable devices, Ferrara Fire Apparatus, Inc. offers protection for up to 6 occupants with side rollover airbags and devices. All occupants are also protected by advanced seat belt restraints that automatically tighten the belt when a vehicle rollover is imminent.

### Driver and Officer Positions

#### Inflatable Tubular Structure (ITS)

Air bag protects with window up or down

#### S4S Unit for Air Ride Seats

Retracts seat to full down position

Places occupant in a safer position for rollover

Maintains seat belt tension

Helps keep occupant from making contact with roof during a rollover

### Rear Facing Crew Member Positions

#### Inflatable Head Curtain (IHC)

Expands and protects from head impact with cab side  
Uses "B" Pillar and fixed window as reaction surface

#### Integrated Buckle Pretensioner (IBP)

Tightens seat belt to help keep occupant fully seated during rollover  
Helps keep occupant from making contact with roof during rollover

### Forward Facing Crew Seated Near Outer Wall

#### Inflatable Tubular Structure (ITS)

No reaction surface is needed, such as a window  
Air bag protects with window up or down

#### Integrated Buckle Pretensioner (IBP)

Tightens seat belt to help keep occupant fully seated during rollover  
Helps keep occupant from making contact with roof during rollover
