

MODULAR FIRE BODIES

Ferrara's Modular Built Like M

Each modular body subframe consists of a welded steel booster tank. Additionally, 3 cross members are in rear compartments.

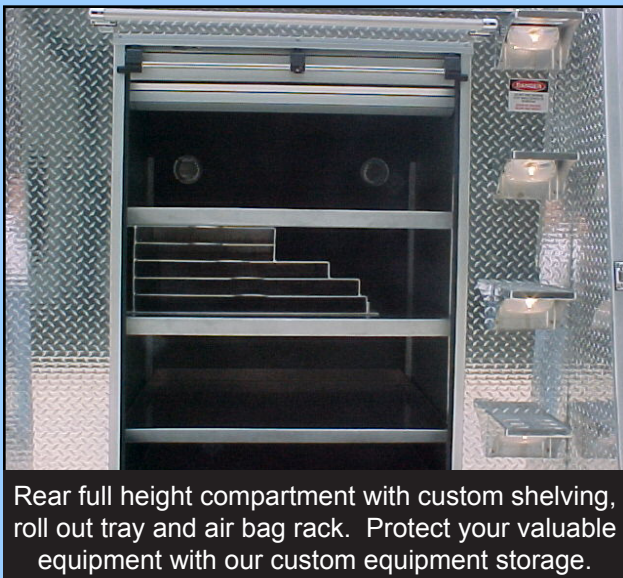

All compartments are true sweep-out style and are reinforced.

Generous 12.25" deep high side compartments. All modular compartment interiors are coated with rugged Ultraliner for years of protection.

Available with full height/ and full depth storage compartments that are up to 30.5" deep.

Rear full height compartment with custom shelving, roll out tray and air bag rack. Protect your valuable equipment with our custom equipment storage.

Compartment floors are reinforced, so carrying generators, extrication tools, etc. is no problem.

Your Choice:

- 12 Gauge Steel
- 3/16" Thick
- 12 Gauge Galvanized

**Traditional Pull Out
Custom Full Height
Style Storage**

ar Fire Bodies. No Other!

Steel grid to support the weight of the body and the full width of the body to brace the front and

reinforced underneath to carry the equipment you need.

Ferrara modular bodies are extremely versatile. Choose the compartment style you need, from traditional pumper style to full height/full depth rescue style.

Ferrara's modular body performs as well as a tanker as it does a pumper, with water tanks available up to 3000 gallons.

**Stainless Steel
Marine Grade Aluminum
Galvanneal Steel**

**Pumper Compartments or
Full Height/Full Depth Rescue
Available**

The all-welded sub-frame of the Ferrara modular fire body is the backbone of the strongest formed body available today. Ferrara's welders are all ANSI certified so you have peace of mind knowing your pumper or tanker body is built by skilled professionals.

Ladders, pike poles and/or backboards can be stored thru-the-tank in a self-supporting sleeve.

Wheel well storage available for spare SCBA bottles, oil dry, winch connections, fire extinguishers, wheel chocks. Let Ferrara's engineers design the right one for you!

Crosslays, Speedlays, Front or Rear Pre-Connects
Side, Top or Rear Pump Panels.

Every component, other than aluminum diamond plate, is protected with a tough, durable DuPont Imron paint finish. We take the subframe and underside of the body a step further with mil-spec undercoating.

12 gauge galvanneal pumper & optional transverse storage

3/16" aluminum, 3000 gallon tanker with optional side dump valves
