

**NON-WALK-IN
RESCUE**

Heavy Rescue

In today's volatile world, every department must have the proper training and reliable equipment to keep them at a high state of readiness.

Ferrara's rescue apparatus provide heavy duty construction and extreme performance, along with custom equipment placement and capabilities, to ensure your unit is ready to respond.

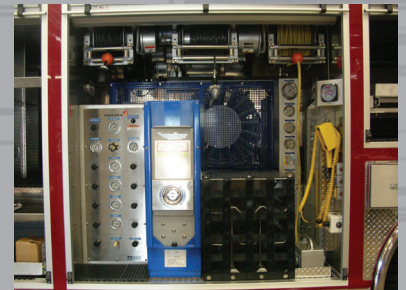

Command Desk

Equipment Storage

Breathing Air

Generators

Extrication Equipment

Scene Lighting

Ferrara's development team will design a vehicle that is custom fitted to your department's exact needs. Each rescue apparatus is engineered to maximize compartment space and storage areas. Custom rescue tool brackets and toolboxes are designed to accommodate the specific equipment and tools being used.

Ferrara's heavy duty construction gives you the strongest rescue apparatus available in the industry.

Heavy rescues are available on Ferrara's Inferno, Igniter, Ember, and Intruder 2 custom chassis.

Our rescue bodies are available in your choice of state of the art high strength extruded aluminum or 12 gauge 304L stainless steel design.

Special compartments located on the roof of the body can be designed to store additional equipment that may make the difference in a response.

From simple SCBA bottle storage to complete compressor system with fully enclosed fill station are available on Ferrara Rescues.

Emergency Response Trailers (ERT's) have become the vehicle of choice for many different governmental, public and private agencies. ERT's can be used for simple equipment transport and community service to full scale National Disasters command and communication centers.

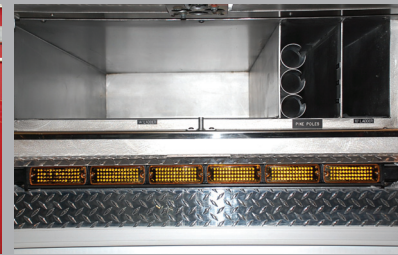

Medium Rescue

Medium duty rescues are built with versatility maximizing and utilizing every inch of space available.

Custom compartments allow your department to carry the extensive amount of rescue equipment required.

14 to 20 foot walk-in or non-walk-in bodies are mounted on lighter GVWR Freightliner, International, Kenworth, Peterbuilt, Mack, or Ford chassis.

Light Rescue

Light duty rescue vehicles are perfect for EMS, first response, supervisor roam units and fire department support.

Each light rescue can be customized to fit any requirement without losing the space and accessibility of equipment.

10 to 14 foot bodies are mounted on lighter GVWR, Dodge, Chevy, GMC, or Ford chassis.
